

## Adjusting the Cord

---

When you have decided on the perfect height for your pendant, the cord can be adjusted accordingly. All electrical work should be carried out by a qualified electrician:

1. Loosen the cord grip fully by turning counter-clockwise.
2. Ease the chord through taking care to pull all three strand to ensure they come through evenly.
3. Tighten the cord grip.
4. The superfluous cord can be trimmed to length for installation.
